

### Summer work

1. Come up with possible titles (this can change at several points during your EPQ journey)
2. Make sure your title allows you to demonstrate higher level skills like planning, researching, evaluating and explaining, rather than just describing.
3. Make sure your title is achievable within around 90 hours work and you have enough to write 5000 words (or 1000 if doing an artefact)
4. Start to do some research. **KEEP A RECORD OF EVERYTHING!**
5. Come to your first lesson in September, with a topic area/working title and a couple of paragraphs explaining...
  - (a) why you are choosing the topic
  - (b) where you will look/have looked for research
