

A Level Computer Science Summer Work 2023

In your bridging lessons you focused on your programming skills. Your summer work will focus on recapping theory you covered at GCSE (or in some cases giving you an idea of what GCSE students have studied).

Log in to Isaac Computer Science (you signed up during Bridging week).

You will see 5 quizzes to complete for 1st September 2023 (dates on screenshot below are old)

1.	GCSE Programming concepts	(Due: 01/09/2022)
2.	GCSE Systems architecture	(Due: 01/09/2022)
3.	GCSE Representation of Numbers	(Due: 01/09/2022)
4.	GCSE Memory and storage	(Due: 01/09/2022)
5.	GCSE Networking	(Due: 01/09/2022)

Non-GCSE Computing Students

Don't worry about your score too much, it will be interesting to get an idea of your wider Computing knowledge. Use the internet to look up anything you don't know. If you would like to get a greater understanding of any of these topics look up [Craig and Dave on YouTube](#).

I have changed my options post results/wasn't in Bridging week.

Sign up to Isaac Computer Science using [this link](#) which should add you to the A Level CompSci 2023-5 group. There should be 5 quizzes to complete.

The code for the class on Isaac Computer Science is - **RLQZ7F**

Questions
