

Psychology

Key Stage 4 (years 9-11)

Learning from 9 in Psychology builds towards studying for the AQA GCSE. This course is attractive to students because it develops a range of valuable skills, including critical analysis, independent thinking and research. These skills are particularly relevant to young people and are transferable to further study and the workplace.

This course offers students an engaging and stimulating introduction to the study of psychology, combined with the academic integrity and skills that Higher Education and employers value.

GCSE Psychology has a blend of biology as well as maths and psychology theory application. This allows students to develop skills in biology, maths and their critical and synoptic skills.

Key Stage 5 (Years 12-13)

Psychology at A level builds on the GCSE by blending scientific psychology as well statistics and psychology theory application. This allows students to develop skills in biology, maths and their critical and synoptic skills.

A lot of our students go on to study Psychology at University level. This course ensures that the psychologists of the future will have a fascinating and coherent introduction to the subject.
